SPECIFICATIONS

Surveying Performance		
Signal Tracking	220 Channels	
Signal Hacking	BDS B1. B2. B3	
	. , , .	
	GPS L1C/A, L1C, L2C, L2E, L1	
	GLONASS L1C/A, L1P, L2C/A, L2P, L3	
	SBAS L1C/A, L5 (Just for the satellites supporting L5)	
	Galileo GIOVE-A, GIOVE-B, E1, E5A, E5B	
	QZSS, WAAS, MSAS, EGNOS	, GAGAN, SBAS
GNSS Features	Positioning output rate:	1Hz~50Hz
	Initialization time:	< 10s
	Initialization reliability:	>99.99%
Positioning Precision	initialization reliability.	>55.5570
Code Differential GNSS Positioning	Horizontal:	\pm 0.25 m + 1 ppm
Code Differential GN33 Fositioning		··
	Vertical:	±0.50 m + 1 ppm
Static CNSS Summering	SBAS positioning accuracy:	** *
Static GNSS Surveying	Horizontal:	\pm 2.5 mm + 0.5 ppm
	Vertical:	\pm 5 mm + 0.5 ppm
Real-Time Kinematic Surveying	Single base (<30km)	
	Horizontal:	\pm 10 mm + 1 ppm
	Vertical:	±20 mm + 1 ppm
Network RTK	Horizontal:	±10 mm + 0.5 ppm
HELWOIK KIK	Vertical:	± 20 mm + 0.5 ppm
	RTK initialization time:	2~8s
Hardware		
Dimension	12.9 cm×11.2cm	
Weight	970g (including installed ba	ttery)
Material	Magnesium aluminum alloy	shell
Temperature	Operating:	45°C ~+60°C
	Storage:	-55°C ~ +85°C
Humidity	Non-condensing	
Level of Protection	Waterproof:	IP67 standard immersion to depth of maximum 1m
Level of Frotection	Dustproof:	IP67 standard against blowing dust
Clark and Miles Res		
Shock and Vibration	Not operating:	Withstand 2 meters high on the rod drop to the cement ground naturally
	While:	Withstand 40G 10 milliseconds sawtooth wave impact test
Electrical		
	2W	
	Single battery:	7h (static mode)
Power Consumption		5h (internal UHF base mode)
Battery Life		6h (rover mode)
Communications and Data Storage		
	5PIN LEMO external power	
IVALOUT		nort + R\$232

GALAXY G1

SOUTH SURVEYING & MAPPING INSTRUMENT CO.,LTD.Add: 2/F,Surveying Building (He Tian Building),NO.26, Ke Yun Road, Guangzhou 510665, China Tel: +86-20-23380891/85524990/23380888 Fax: +86-20-85524889/85529089/23380800 Target your success

E-mail: mail@southsurvey.com export@southsurvey.com impexp@southsurvey.com gnss@southsurvey.com http://www.southinstrument.com http://www.southsurvey.com The new RTK surveying system "Galaxy G1" of SOUTH integrates with outstanding technological design, excellent surveying properties and advanced Inertial navigation technology. Its small body with excellent performance will provide faster, efficient and secure surveying experience, makes you feel the technical charm of information age!

- 1. Bluetooth indicator
- 2. DATA interaction
- 3. Satellite indicator

- 4. Power key
- 5. Battery housing
- 6. Loudspeaker

- 7. UHF/GSM antenna interface
- 8. Standard LEMO(5 pins)
- 9. USB/RS232

KEY FEATURES

Miniaturization

11.2cm high, 12.9cm in diameter, extremely small compact type design, the weight is only 970g, the smallest and lightest RTK made in China, leads the miniaturization of the new trend of the times.

Convenience

Travel light, makes the surveying no longer bear heavy load. New miniature RTK surveying system, the receivers and bags have become more compact, and the weight of a full set of equipment reduces by 30% compare to the previous generation.

Double module long distance Bluetooth

The pioneered Bluetooth communication technology in the industry, equipped with 4.0 standard double module long distance Bluetooth, it can connect to the mainstream consumer digital products such as mobile phones, tablets. Backward compatible with 2.1 standard at the same time, connects to the industrial grade controller. Efficient and stable data transmission technology, long distance Bluetooth, supply users more free work experience.

Tilt survey

While working, the users don't need to center to the point, the built-in tilt compensator can correct the coordinates automatically according to the tilt direction and angle of centering rod , get the correct ground coordinates.

Electronic bubble

Checking whether the centering rod is level, users don't have to pay attention to the physical bubble of the rod, the electronic bubble of the controller survey software accurately displays the leveling status of centering rod in real time.

STANDARD SET

External radio transmitter (standard supply)

Our high speed wireless digital radio is integrated with ten years radio design and production experience of SOUTH, adopting radio frequency and digital processing, baseband processing technology, air transmission rate reaches to 19200bp, radio-frequency emission power top to 25W, reliable performance, strong stability, is more suitable for RTK fieldwork.

RTK carrying case

The convenient RTK carrying case is customized for surveying workers, which adopts double oxford tabby textile fabric and YKK industrial grade waterproof zipper. It has strong abrasive resistance and waterproofness. Meanwhile the unique backpack design reduces the heavy burden of field work.

Surveying software

Galaxy G1 RTK surveying system can equipped with SOUTH professional surveying software for special industries, such as engineering star, SurvCE, FieldGenius and so on.

Engineering star (standard supply): it's our kernel surveying software, the main functions are detail survey, stake out point, stake out line, coordinate system transformation and so on. It's a powerful and efficient software for RTK survey.

All constellations

Multiple constellations and multiband receiving technology, supports all existing and planned GNSS satellite signals, especially beidou frequencies B1, B2, B3, support single beidou positioning system.

Appearance and material

Tough appearance design, tasteful color collocation, makes survey also become high end. Small and light magnesium alloy shell makes it lighter, more wear-resisting, resistance to impact, promotes the receivers protection performance.

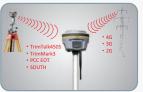

Intelligent platform

A new efficiently intelligent kernel platform, with faster computing power and lower power consumption, improving the whole stability of the receivers. Based on the platform, the receivers can monitor the running state of every section in real-time, the intelligent adjusting electricity mode can prolong the fieldwork time.

Cloud service

Cloud service support for 24 hours, to meet customers' diverse needs such as online upgrade, online registration, and remote diagnosis at all time.

Universal data communications

Supporting the mainstream radio communication protocols, realizing the interconnection and interworking with other brand products. New network module framework framework, supports for multiple network types, seamlessly compatible with CORS system.
